

ABSTRACT

A combination entertainment system for  
5 providing both jukebox and game entertainment is  
disclosed. The entertainment system comprises a  
jukebox subsystem, a dart game subsystem, and a  
control subsystem that coordinates a jukebox mode of  
operation and a dart game mode of operation. Also  
10 disclosed is a method of operation for the  
combination jukebox and game entertainment system.  
The method transfers operation between game,  
jukebox, and advertisement modes of operation, based  
on patron input and the current operating mode of  
15 the system.
